

December 2017

Wishing our clients and everyone we have met throughout the year a Merry Christmas and a Prosperous and exciting 2018.

## Newsletter

As the year draws to a close, it is time to reflect on what has been a very exciting and successful year for Energy for Good. It has been with our great pleasure and enjoyment that over the year we have been able to make contributions to some very worthy causes.

Our Dynamic Purchasing System that became OJEU compliant at the beginning of 2017 has been so well received with all those that have been able to utilise its benefits during their contract renewals. Currently the DPS is managing over 3000 sites across the UK.

The UK major energy supplier network have complimented the Energy for Good process as being refreshingly efficient and technically competent. Commenting that it enables them to bid for our client's contracts with confidence in accuracy, transparency and fairness.

However, for Energy for Good the excitement has been the results we have achieved for our clients in attractive pricing and products as well as the ability to make contributions as a 'not for profit' business to some tremendous good causes.

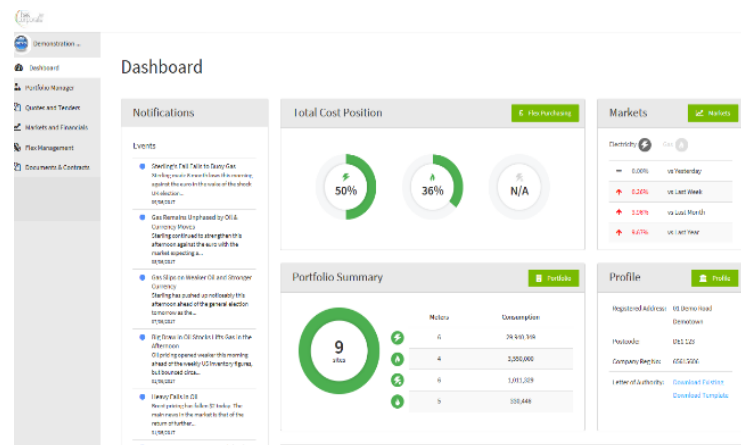

During November we were pleased to be able to hand over a cheque to Cancer Research who lead the way in finding ways to beat cancer

**Nichola Whymark, Cancer Research UK's Fundraising Manager, said:**

*"Cancer Research UK receives no government funding and is solely reliant on donations from our fantastic supporters like Energy for Good."*

Continuing in the development of the DPS has been helped by the open forum of discussion that we encourage with all our clients as the end users. This has led to throughout 2017 some very seamless updates that have added greater functionality in the areas of Portfolio Management, Budgeting and Live Forecasting which further enhances the uniqueness of the DPS.

Recently we were very proud to give £5,000 to Inspire Suffolk. The charity works with young people who are not in education, employment or training. They aim to support young people to overcome challenges they are facing and onto sustainable outcomes.

The young people that they work with may be experiencing a range of challenges which can include lack of confidence, mental health issues, homelessness and unemployment to name a few.

This is the nominated charity for the Chairman of Suffolk County Council, Stephen Burroughes who said;

*“Through using their fantastic not-for-profit procurement framework, we have been able to redirect an amazing £5,000 to a cause which brings huge benefit to the local community.*

*“I would like to take this opportunity to thank all involved with the process; especially Energy for Good for their partnership, support and generous donation.”*

Looking towards 2018, Energy for Good will be directly supporting three very well deserving causes as well as contributing to our clients own good causes through the public-sector tendering.

**Our nominated causes are;**

*Our work supports 16-24 years olds to find, gain and stay in work. 86% of those we help go on to stay in work.*

*Cool Earth is an NGO that works alongside rainforest communities to halt deforestation and climate change. Cool Earth puts local people back in control, giving them the resources they need to keep their forest intact. We are changing the way rainforests are protected.*

**Spring 2018**

In time for The Energyst Event on 17<sup>th</sup> April, look out for your ‘nomination coin’ which will be distributed through the Energyst Magazine. Each coin voucher will carry a value of £1 and you will be able to decide to which of the good causes you would like it to go to. This can be done either online or why not visit us at the event and put your choice in the appropriate voting box and will also enter you into a prize draw.
